

Capability Statement

Company Overview

3N Infotech is a technology consulting firm specializing in Data & Analytics, Business Intelligence, Cloud Modernization, Data Integration, and Enterprise Reporting solutions. We help federal agencies, state and local governments, associations, and commercial organizations transform complex data into actionable intelligence through modern cloud-based architectures and analytics platforms.

Our team brings decades of experience delivering mission-critical reporting, data warehousing, business intelligence, and enterprise data management solutions across Microsoft, SAP, Salesforce, Dynamics 365, and cloud ecosystems.

Core Competencies

Data & Analytics Modernization

- Microsoft Fabric Implementation & Optimization
- Data Lakehouse Architecture
- Enterprise Data Warehousing
- Data Modeling & Semantic Layer Design
- Real-Time Analytics
- Predictive Analytics & AI Readiness
- Master Data Management (MDM)
- Data Governance & Data Quality

Business Intelligence & Reporting

- Microsoft Power BI
- SAP BusinessObjects (BOBJ)
- Crystal Reports
- SSRS
- Tableau
- Qlik Sense
- Executive Dashboards & KPI Frameworks
- Self-Service Analytics

Data Integration & Engineering

- Microsoft Fabric Data Factory
- Azure Data Factory
- ETL/ELT Development
- API Integrations
- Data Migration & Modernization
- Legacy Platform Consolidation
- Data Pipeline Automation
- OneLake Architecture

Microsoft Technologies

- Microsoft Fabric
- Power BI
- Azure Data Platform
- Azure SQL
- Dataverse
- Dynamics 365
- SharePoint
- Microsoft 365 Data Integration

Enterprise Application Integration

- Dynamics 365
- Salesforce
- SAP
- NetForum
- Fonteva
- Personify
- Association Management Systems
- Financial & ERP Platforms

Managed Analytics Services

- Platform Administration
 - Capacity Monitoring
 - Data Pipeline Support
 - Report Development
 - Production Support
 - Performance Optimization
 - Analytics Center of Excellence (CoE)
-

Differentiators

Deep Analytics Expertise

Unlike general IT integrators, 3N Infotech focuses specifically on data, analytics, reporting, and decision-support systems.

Legacy-to-Modern Platform Migration

Proven experience modernizing enterprise reporting environments from SAP BusinessObjects, Crystal Reports, SSRS, and legacy data warehouses into modern Microsoft analytics platforms. Organizations are increasingly pursuing these migrations to reduce complexity and improve self-service analytics capabilities.

Microsoft Fabric Specialists

Expertise across the entire Microsoft Fabric ecosystem, including:

- OneLake
- Data Engineering
- Data Warehousing
- Data Science
- Real-Time Analytics
- Power BI
- Governance & Security

Microsoft Fabric enables organizations to unify data engineering, warehousing, analytics, and business intelligence on a single platform.

Business-Focused Delivery

We bridge the gap between technical implementation and business outcomes by aligning analytics solutions with mission objectives, operational performance, compliance requirements, and executive decision-making.

Rapid Time-to-Value

Our delivery approach emphasizes:

- Reusable frameworks
- Accelerated implementation
- Agile delivery

- Reduced project risk
- Lower total cost of ownership

Past Performance Highlights (Representative)

- Microsoft Fabric Data Warehouse and Lakehouse implementations.
- Enterprise analytics modernization initiatives.
- SAP BusinessObjects to Power BI migrations.
- Dynamics 365 and Dataverse reporting solutions.
- Data quality and governance programs.
- Automated reporting and dashboard ecosystems.
- Cloud-based ETL and data integration platforms.
